

Demand for facilities due to increase in bicycle commuting.

Our Australian distributor, Automatic heating, built a prefab skid frame with iTOMIC 15kW CO2 heat pumps for easy installation and space-saving design.

Background

- Bicycle parking + shower facilities are increasing in office buildings and universities in the city center.
- It needs to be installed in an existing office building or university, and there is also the issue of installation space.

Results

- Install CO2 Heat pump 15H2×2units
- Prefabricated skid frames enable installation in small spaces in a short time
