

To cover the large amount of hot water used by spectators and athletes.

With an area of 385,000 square metres, it can accommodate more than 60,000 people at the same time.

11 × 80Y are installed to cover the large demand of hot water.

### Background

- The refurbishment has increased the capacity and demand for hot water has increased dramatically.
- A back-up system was needed in case the main boiler alone was insufficient to supply hot water or against breakdowns.

### Results

- The risk of insufficient hot water supply was avoided.
- Hot water can now be supplied while the main boiler is under maintenance.
