

## CO2 heat pumps has been installed in Universities.

Since CO2HP is not major in Republic of Korea, HANIL ECO explained advantage of CO2 Heat Pump to design company and universities and installed CO2 Heat Pump to student dormitories of many universities.

### Background

- Many universities use gas boilers for water heating.
- Heat pumps were not common on the market at that time.

### Results

- Raised awareness of CO2 heat pumps by giving presentations at university associations.
- Install CO2 heat pumps to universities.
- Contributes to the environment and energy savings
