

Combining cutting-edge medical care with an all-electric, carbon-neutral future.

The Hospital's level 5 and 13 plantrooms were equipped with tailored hot water solutions.

The skid-mounted system features 5 Revere CO₂ heat pumps and was craned into place.

Background

- Backed by a AUD1.1 billion investment from the Victorian Government.
- Designed with both community health and environmental sustainability in mind.

Results

- Install CO₂ Heat pump 80Y×10 unit
- It became a model case for all-electric innovation in Victoria.
